The President of Egyptian Stock Market Mohamed Omran and the Vice-President of Misr For Central Clearing, Depository & Registry Tarek Abdel-Bary deliver lectures, at Faculty of Commerce, Cairo University. The seminar is run by Cairo University Faculty of Commerce Vice-Dean for Community Service and Environmental Development Mohamed Gouda Hazin.

Southeast University

On March 5th 2017, the Society of Interventional Radiology (SIR) presented its highest honor, the SIR Gold Medal during its Annual Scientific Meeting in Washington Convention Center. Professor and doctoral tutor of SEU Gao-Jun Teng, famous interventional medical expert, president of Zhongda Hospital, Southeast University and chief physician of interventional radiology and vascular surgery, was awarded the 2017 SIR Gold Medal, becoming one of the three honorees. The current President Professor Charles E. Ray presented the award to Professor Teng. This is the first time since the establishment of the award 21 years ago that a doctor of interventional radiology from mainland China received this award.

The Annual Gold Medal, presented by the Society of Interventional Radiology, is the highest honor in the field of interventional radiology, honoring experts who made great contribution. It was established in 1996, so far only 54 people have received this honor. Previous to this, no Chinese doctor has been selected.
Ulm University

The University Ulm constrained place 347 in the world ranking QS World University Rankings. Subdivided by Subjects Ulm achieved following places: Physics and Astronomy place 201, Life Science and Medicine place 257, Natural Science place 299 and Chemistry place 351. At the category “Top 50 under 50 and Next 50 under 50” Ulm took place 38.

Prof. Carsten Streb’s team, from the Institute of Inorganic Chemistry, developed in cooperation with Spanish colleagues a new procedure of water filtering. In comparison to current methods, not only a specific pollutant but all of them, even radioactive substances, will be filtered and the ingredients for the new method cost only a few cents. This procedure for manufacturing drinkable water is not yet on market, but it will be in five years, so Prof. Streb.

Moscow State University

Lomonosov Moscow State University (MSU) entered into the list of 50 best universities in the world ranking QS World University Rankings by Subject. MSU took the 13th place in the field of "Linguistics", 21st in the field of "Physics and Astronomy" and 33rd in the field of "Mathematics".
