

The **Faculty of Engineering and Computer Sciences**, of the University of Ulm invites applications for a tenured

Professorship (W3) in Media Informatics

in the **Institute for Media Informatics**. The position includes the deputy directorship of the institute.

The scientific focus of the professorship should lie in one or several of the following areas:

- Computer graphics
- Computer animation
- Visualization

The successful candidate will propose a research program that strengthens and complements the current interdisciplinary research activities in the faculty and university as a whole, with special emphasis given to SFB/Transregio 62 „A companion technology for cognitive technical systems”. Demonstrated success in the acquisition of research funding and in the realization of international collaborations is expected.

We seek an individual with a passion for teaching, who is qualified to offer instruction both the B.Sc. and M.Sc. levels in the media informatics and informatics programs, as well as in other programs related to computer science. Basic-level instruction must be offered in German. Active participation in the faculty's self administration is required.

Conditions for appointment are a completed course of studies at a university, pedagogical aptitude, doctorate and additional academic achievements (§ 47 LHG).

The University of Ulm is committed to increase the share of women in research and teaching positions and therefore explicitly encourages female candidates to apply.

Interested candidates should submit an application containing the usual documentation **by 16 March 2012** to the Dean of the Faculty of Engineering and Computer Science of the University of Ulm, James-Franck-Ring, 89081 Ulm, Germany. Additionally, an electronic version (in pdf format) should be sent to in.dekanat@uni-ulm.de. Please indicate on the **envelope the index number 9**.

Physically disabled applicants receive favorable consideration when equally qualified.
