

Zeitplan

Probenvorträge DAGStat Tagung 2016

- 09:00** **Maria Umlauf**
“Analysing a recent study on childhood maltreatment by means of permutation tests for nonparametric factorial designs”
- 10:00** **Sarah Friedrich**
“Permuting longitudinal data despite all the dependencies”
- 11:00** **Lubna Amro**
“Asymptotically Robust Permutation Tests for Incomplete Paired Data”
- 15:00** **Verena Endriss**
“Confidence Intervals for the difference of proportions adjusted for covariates”
- 16:00** **Anja Bertsche**
“Bayesian Phase II Optimization for Time-To-Event Data Based on Historical Information”
- 17:00** **Madlen Gebauer**
“Nested case-control designs in a subsequent event setting”
- 18:00** **Alisa Lüll**
“Estimating pregnancy outcome probabilities in the presence of dependent left-truncation”
