

The **Faculty of Mathematics and Economics** at Ulm University invites applications for

**a Professorship (W3) in "Stochastics"**

to be filled by **1 October 2018**.

Candidates should have an internationally outstanding research and teaching record in Stochastics (Probability Theory and Mathematical Statistics) as well as experience in the acquisition of third party funding. The research focus should be in the area of Stochastics at the interface with Analysis (e.g. Stochastic Partial Differential Equations) with relations to applications in the natural or life sciences or in engineering. A particular interest in collaborations within the various research areas of Ulm University and with further local research institutions is desired.

The teaching includes courses for students in our mathematical and teacher training programmes as well as mathematical courses for students in other study programmes.

Conditions for appointment are a completed course of studies at a university, pedagogical aptitude, doctorate and additional academic qualification (§ 47 LHG).

Ulm University is committed to increase the share of women in research and teaching and therefore explicitly encourages female candidates to apply.

Applications with the usual documents (including CV, teaching experience, the three most important publications, and certificates of academic degrees and other relevant verifications) are due by **5 January 2018** to the Dean of the Faculty of Mathematics and Economics, Prof. Dr. Alexander Lindner, Ulm University, D-89069 Ulm, (Phone: +49 731 50 23500, Fax: +49 731 50 23610, <http://www.uni-ulm.de/mawi>). Please send all documents in electronic form in one single PDF file (Email: [mawi.dekanat@uni-ulm.de](mailto:mawi.dekanat@uni-ulm.de)) indicating the **reference number 118 in the subject line**.

Physically disabled applicants receive favourable consideration when equally qualified.
