Lectures and Courses

Summer Semester 2014

| Uni-Ulm | **Institute of General Zoology and Endocrinology**

Molecular Biology

Course description

The course provides a general overview of current approaches in molecular biology.

19. May 2014

The RNA molecules: structure, function and analysis

26. May 2014

Cell transfection methods and model organisms

Venue and date

Lecture hall: H13

Monday 10:15
