The Institute of Organic Chemistry III and Macromolecular Chemistry at the University of Ulm (Germany) invites applications for the position of a

*Postdoctoral Researcher (f/m)*

in Synthetic Macromolecular and Organic Chemistry  
starting at January 1st, 2017  
(the contract length is limited to 1 year).

We are looking for a highly motivated polymer/organic chemist (Ph.D.) with strong interest in synthesis and characterization of functional nanomaterials. Applicants should be fluent in English and possess good communication and team working skills. The goal of the one year project is to prepare polymeric/oligomer-ric precursors for nanodiamonds in the frame of an interdisciplinary collaboration with physics.

**We offer:**  
- Working in an international research team in well-equipped laboratories  
- Employment, payment and social benefits according to TV-L (German Public Sector Collective Agreement)

The University of Ulm is an equal opportunities employer. Severely disabled applicants with adequate qualification are given preference.

Interested candidates should send their applications (CV, publication list, two-page summary of PhD work, at least one letter of recommendation) by **November 1st 2016** as a single pdf document to tanja.weil@uni-ulm.de or peter.baue erle@uni-ulm.de. Letters of recommendation can also be sent by separate email.
