| Learning objectives   | Students who successfully passed this module
  - are familiar with concepts and techniques used in modern Quantum Optics
  - know the application of Laser Physics and the applications of laser for cavity QED |
| Syllabus              | Laser Physics
  - Quantum nature of light
  - Interaction of light and matter
  - Atomic and "atom-like" systems
  - Cavity Quantum Electrodynamics
  - Current research topics in quantum optics (nonlinear optics, quantum entanglement, Bell’s inequalities, quantum teleportation, quantum cryptography, quantum computing) |
| Literature            | Specific literature will be provided throughout the course. In-depth literature research is also part of independent preparation of the student presentations.
Quantum Optics books for general preparation:
  - G. Grynberg, A. Aspect and C. Fabre, Introduction to Quantum Optics
  - M. Fox, Quantum Optics An introduction (Oxford University Press)
  - M. O. Scully and M. S. Zubairy, Quantum Optics (Cambridge University Press, Cambridge, 1997)

More specialized books:
  - C. Cohen-Tannoudji, J. Dupont-Roc, and G. Grynberg, Atom-Photon Interactions (Wiley-Interscience); comment: specialized on Light Atom
Interaction

  Comment: “Specialized on cavity quantum electrodynamics”
  Comment: “Specialized on quantum information”

Teaching and learning methods

| Lecture (4 hours per week) |
| Exercise (1 hour per week) |

Workload

- 45 hours lecture (attendance time)
- 30 hours exercise (attendance time)
- 105 hours self-study and exam preparation
- Total: 180 hours

Assessment

Written or oral examination. A prerequisite for the participation in the examination is an ungraded course achievement. Form and scope of the examination and of the course achievement are determined and notified by the lecturer at the beginning of the course.

Examination

- 13079 Experimental Quantum Optics (precourse)
- 13078 Experimental Quantum Optics

Grading procedure

The module grade is the examination grade.

Basis for Research in the fields of Quantum Information and Technologies
