Biophysics of Hearing and Seeing

Prof. Hoerber

Description

The course on Biophysics of Hearing and Seeing will provide a basic understanding of these senses with respect to their anatomy and physiology. In comparison with recent technical developments of optical and acoustic sensor systems, the physical principals to characterize the performance of these senses will be introduced.

Content

- Evolution of seeing
- New developments in imaging and image processing techniques
- Anatomy and Physiology of the Eye
- Comparison between natural and artificial systems
- Introduction to Acoustic
- Anatomy and Physiology of the Ear
- Comparison between natural and artificial systems

Prerequisites
