

7th Int. Conference on Business Process Management (BPM'09)
7-10 September 2009, Ulm, Germany
www.bpm2009.org

Conference Information

General Information

BPM'09 is the seventh international conference in a series that provides the most distinguished specialized forum for researchers and practitioners in business process management.

Additionally to the main conference track we will present outstanding keynote speakers and tracks for workshops, tutorials, panels and demos.

The BPM'09 has the EMISA'09 as co-located conference.

Main Conference Track

- Process Modeling I+II
- Managing Processes
- Process Mining I+II
- Processes and Services
- Verification and Compliance

Tutorials and Panels

- BPMN 2.0
- Business Process Modeling
- Process Model Comprehension
- Process Flexibility
- Process Compliance

8 Workshops

Idea and experience exchange between practitioners and researchers on the following topics:
Reference Modeling, Empirical Research, Process Design, Collaborative Processes, Processes in Health care, Process Intelligence, Social Software and Event-Driven Processes

Demonstrations

Demonstrations of innovative and groundbreaking research prototypes from all over the world.

Who Should Attend

Researchers to discuss on the latest topics

Experienced Practitioners to get an update on state-of-the-art Process Management

Novice Practitioners to get a broad introduction to BPM and meet experts

Students to get in touch with a fascinating personal field

More information and registration on the conference website:
www.bpm2009.org

Venue Ulm

Ulm stands not only for the *highest church steeple* in the world and the birth place of *Albert Einstein*, but also for a powerful business location (*Daimler, Ratiopharm, Nokia*) as well as an innovative university.

The hosting institute *DBIS* can build on over *10 years of research* on workflow management and process flexibility.
