# EMISA 2009

3<sup>rd</sup> International Workshop on

## Enterprise Modelling and Information Systems Architectures

Concepts and Applications

### In Retrospect

The 3rd International Workshop on Enterprise Modelling and Information Systems Architectures (EMISA'09) addressed all aspects relevant to enterprise modelling as well as to designing enterprise architectures in general and information systems architectures in particular. The workshop was jointly organized by the GI Special Interest Group on Modelling Business Information Systems (GI-SIG MoBIS) and the GI Special Interest Group on Design Methods for Information Systems (GI-SIG EMISA).

EMISA'09 attracted more than 30 participants from 6 countries (e.g., Luxemburg or Australia). The workshop was a full 2-day event featuring 11 high-quality presentations from academia and practice. This year's contributions addressed the research areas of enterprise modelling, measurements, analysis and explorative studies, business process management, and enterprise architectures.

Two keynotes from the outstanding speakers Bertram Ludäscher (University of California) and Manfred Reichert (Ulm University) complemented the workshop programme. On the first workshop day, Bertram Ludäscher highlighted the vision and the challenges of scientific workflows. On the second workshop day, Manfred Reichert reported on so-called "fluid" processes, a new class of processes whose engineering and use is indistinguishable.

EMISA'09 was hosted by Ulm University, Germany, and co-located with the seventh International Conference on Business Process Management (BPM'09).

on Design Methods for Information Systems

**SIG MoBIS**

Special Interest Group  
on Modelling Business Information Systems

EMISA'09 was also co-located with the meeting of the management board of the GI-SIG MoBIS and the meeting of the GI-SIG EMISA. This year the election of the GI-EMISA management board took place.

On the second workshop day, EMISA'09 was co-located with the meeting of the EMISA working group "Flexible Service- and Process-oriented Information Systems".

The workshop social event took place at the restaurant and beer garden Drei Kannen where the workshop participants enjoyed traditional Swabian cuisine in the unique atmosphere of an old brewery.

## Proceedings

Mendling, Jan and Rinderle-Ma, Stefanie and Esswein, Werner, eds. (2009) : *Enterprise Modelling and Information Systems Architectures, Proceedings of the 3rd International Workshop on Enterprise Modelling and Information Systems Architectures (EMISA'09)*. Lecture Notes in Informatics (LNI), P-152 . Gesellschaft für Informatik. ISBN 978-3-88579-246-8

## Programme Chairs

Jan Mendling  
Humboldt University Berlin, Germany

Stefanie Rinderle-Ma  
Ulm University, Germany

Werner Esswein  
Technical University Dresden, Germany
