

Location

Ulm University, Ulm, Germany

Co-located with the 7th International Conference on Business Process Management (BPM 2009).

Ulm shares the River Danube with its twin city Neu-Ulm and is surrounded by the picturesque Swabian Alb region. Besides its tallest church in the world, the Ulm Minster, Ulm offers an attractive balance between historical quarters and modern buildings. With the Alpes and the Lake of Constance region reachable within about one hour driving distance, Ulm also provides many interesting possibilities for sightseeing, sports, and relaxing.

Ulm is located in Southern Germany between Stuttgart and Munich. Thus, it is possible to travel from both these cities (and in particular their airports) to Ulm easily and quickly. The same is true for Frankfurt, which has one of the most frequented and best connected airports in Europe.

GI-SIG MobIS

Conceptual Modelling is pivotal for analysing and designing information systems that are in line with a company's long term strategy and that efficiently support its core business processes. The Special Interest Group on Modelling Business Information Systems (SIG MobIS) within the German Informatics Society (GI) is aimed at providing a forum for exchanging ideas and solutions on modelling research within Information Systems both for researchers at universities and experts in industry.

GI-SIG EMISA

The GI Special Interest Group on Design Methods for Information Systems provides a forum for researchers from various disciplines who develop and apply methods to support the analysis and design of information systems.

Additional Information

For more information please access the workshop's website at www.uni-ulm.de/in/emisa09 or contact the workshop chairs:

Werner Esswein (University of Technology Dresden)
Email: werner.esswein@tu-dresden.de

Jan Mendling (Humboldt University Berlin)
Email: jan.mendling@wiwi.hu-berlin.de

Stefanie Rinderle-Ma (Ulm University)
Email: stefanie.rinderle@uni-ulm.de

Important Dates

Submission: May 21, 2009
Notification: July 09, 2009
Final version: July 30, 2009

3rd international Workshop on Enterprise Modelling and Information Systems Architectures

Concepts and Applications

Call for papers

September 10–11, 2009
Ulm, Germany

SIG|MoBIS
Special Interest Group
on Modelling Business Information Systems

SIG EMISA
Special Interest Group
on Design Methods for Information Systems

Objectives

The strategic importance of modelling is recognized by an increasing number of companies and public agencies. Enterprise modelling delivers the "blueprints" for codesigning organisations and their information systems, so that they complement each other in an optimal way. Achieving this interplay requires a multi-perspective approach that takes into account technical, organisational and economic aspects. It also recommends the cooperation of researchers from different fields such as Information Systems, Business Informatics, and Computer Science.

Subject and Topics

The workshop will address all aspects relevant for enterprise modelling and for the design of information systems architectures. It will provide an international forum to explore new avenues by combining the contributions of different schools of Information Systems, Business Informatics, and Computer Science. Therefore, the workshop is open for a broad range of subjects. Possible topics include, but are not limited to:

- enterprise modelling: languages, methods and tools
- reference models
- patterns for enterprise modelling (e.g. process patterns)
- modelling services and service compositions in service-oriented architectures
- process modelling in process-aware information systems
- component-oriented software architectures
- model-driven system development
- model analysis and simulation
- ontologies for enterprise modelling
- model evolution, model life cycle management
- management of model variants and versions
- model quality (e.g., compliance between the system and model level)
- modelling cross-organisational cooperation
- emerging areas (e.g. value-based modelling)
- communities for developing open reference models

Organisation

The workshop is jointly organised by the GI Special Interest Group on Modelling Business Information Systems (GI-SIG MobIS) and the GI Special Interest Group on Design Methods for Information Systems (GI-SIG EMISA).

Local organisation:

Stefanie Rinderle-Ma (Ulm University)

Email: stefanie.rinderle@uni-ulm.de

Linh Thao Ly (Ulm University)

Email: thao.ly@uni-ulm.de

Paper Submission

Authors are invited to submit papers limited to 14 pages in length, by May 21st, 2009. Papers have to be formatted according to the LNI guidelines. Accepted papers will be published in the GI LNI series, and selected papers will be invited for renowned journals.

Programme Committee

Witold Abramowicz, Poznan University of Economics
Antonia Albani, University of Augsburg/TU Delft
Colin Atkinson, University of Mannheim
Lars Bækgaard, Aarhus School of Business
Jörg Becker, University of Münster
Martin Bertram, Commerzbank Frankfurt
Peter Bøgh Andersen, Aarhus University
Jörg Desel, KU Eichstätt
Fernand Feltz, CREDI Luxembourg
Ulrich Frank, University of Duisburg-Essen
Andreas Gadatsch, FH Siegburg-Bonn
Claude Godart, Université Henri Poincaré Nancy
Wilhelm Hasselbring, University of Kiel
Brian Henderson-Sellers, University of Technology Sydney
Heinrich Jasper, Freiberg University of Technology
Reinhard Jung, Universität Duisburg-Essen

Dimitris Karagiannis, University of Vienna
Fredrik Karlsson, Örebro University
Roland Kaschek, Kimep Almaty
Stefan Kirn, Universität Hohenheim
Ralf Klischewski, German University Kairo
Gerhard Knolmayer, Universität Bern
Horst Kremers, CODATA
John Krogstie, University of Trondheim
Dominik Kuroepka, HPI Potsdam
Susanne Leist, University of Regensburg
Stephen W. Liddle, Brigham Young University
Mikael Lind, University College of Borås
Peter Loos, Universität des Saarlandes
Bernd Müller, FH Wolfenbüttel
Klaus-Walter Müller, MSG Systems AG, München
Markus Nüttgens, University of Hamburg
Andreas Oberweis, University of Karlsruhe
Erich Ortner, TU Darmstadt
Sven Overhage, University of Augsburg
Hansjürgen Paul, Institut Arbeit und Technik
Erik Proper, Radboud University, Nijmegen
Michael Rebstock, University of Applied Sciences Darmstadt
Manfred Reichert, Ulm University
Peter Rittgen, Vlerick Leuven Gent Management School
Michael Rosemann, Queensland University of Technology
Matti Rossi, Helsinki Business School
Gunter Saake, University of Magdeburg
Eike Schallehn, University of Magdeburg
Guttorm Sindre, University of Trondheim
Elmar J. Sinz, University of Bamberg
Stefan Strecker, University of Duisburg-Essen
Klaus Turowski, University of Augsburg
Willem-Jan van den Heuvel, Tilburg University
Gottfried Vossen, University of Münster
Barbara Weber, Universität Innsbruck
Hans Weigand, Tilburg University
Mathias Weske, HPI Potsdam
Roel Wieringa, University of Twente
Robert Winter, University of St. Gallen
