Student Assistant wanted, ~25-50 h/month, Department Human Factors

The Human Factors department is looking for one motivated, competent, and reliable student assistant with 50 h/month or two student assistants with ~25h/month who enjoy and are interested in working in an interdisciplinary team on the human-machine interface **starting as soon as possible**.

Your profile:

- You are in a Bachelor's (3rd semester or higher) / or Master's program in **Psychology, Computer Science, Media Informatics, Cognitive Systems**, or a comparable course of study
- You would like to get an insight into research on the interaction between humans and technical systems, e.g., automated vehicles

Possible responsibilities:

Active participation and support in research projects:

- Statistical data preparation and analysis (with R)
- Literature research and preparation, support in writing research papers

Knowledge/Requirements:

- Good / advanced knowledge of statistics (R)
- Good English skills
- Good MS Office (PowerPoint, Excel, etc...) skills
- Motivation to support in writing research papers

Interested or questions? Feel free to get in touch or apply directly with your CV and a recent transcript of records at luisa.heinrich@uni-ulm.de
