

To strengthen our Team in the company area Industrial Metrology in Oberkochen (Baden-Württemberg/Germany), starting in July 2018 we are offering an

Internship as Business Visionary in our Digital Business Development Team, Duration: about 3-6 months

Your job

We at ZEISS actively drive the digital transformation with our customers in industries like automotive, medical or aerospace industry. The Business Group Industrial Metrology delivers highest precision metrology hard- and software solutions that enable our customers to meet best quality standards. We want our customers to be successful through innovative digital solutions using IoT-technology, open industry platforms like ADAMOS or data-driven services.

As an intern, you will be an active part of an innovative business development team from day one that is identifying and implementing solutions to meet rising customer needs and current market trends for digital business models such as subscription, pay per use or cloud solutions. You will be involved in developing and implementing digital business models to serve rising needs of our customers and develop adequate pricing strategies. In order to be successful, this will be done in close collaboration with colleagues from various functions such as Product Management, Sales and Marketing, the ZEISS Digital Innovation Partners or our global sales and service companies.

Our requirements

- above-average university performance in a scientific, engineering or business discipline
- strong collaborative and team-working skills, structured and results-oriented working methods
- strong interest and ideally first expertise with digital business models, data analytics or (software) sales
- strong communication skills to easily work in cross-functional team within Industrial Metrology and corporate environment as well as within agile teams
- first practical experiences
- very good knowledge of English

With more than 27,000 employees, ZEISS is one of the global leaders in the optical and optoelectronic industries and has been contributing to technological progress for 170 years. ZEISS develops and distributes lithography optics, measuring technology, microscopes,

medical technology, eyeglass lenses, camera and cine lenses, binoculars and planetarium technology.

As a student, you will work with your colleagues as an equal. You will receive detailed insights into a company that creates products for tomorrow's world and lay the optimal foundation for your future career.

If you have any questions, please contact Mr. Daniel Spengler on +49 151 7300 48 31.
