

YMMOR

Young Mathematicians in Model Order Reduction

20 - 24 March 2023
Ulm University

The idea of the YMMOR conference is to bring together young researchers, working in the field of Model Order Reduction, in an informal atmosphere and it is entirely in the spirit of scientific exchange.

The conference is addressed to master students, doctoral students and early postdocs. Basic knowledge in the field of MOR is required for the conference. In addition, each participant should present his/her own research status, open questions of the research field or a topic in the field of MOR in which he/she is interested in.

The conference is expected to be fully on site.
