For the Institute of Strategic Management and Finance we are looking for a/an

Academic employee (m/f/d)

Your profile:

- > The applicant should have a very good university degree in management and economics (business administration, economics) or in a mathematically-/statistically-oriented study programme.
- > We welcome experience in empirical study projects, applied programming (esp. Python and/or Solidity), statistical packages (R, STATA), and relevant industry experience.
- > We also appreciate good command of German.

Your responsibilities:

- > The planned empirical research project should focus on crypto assets, in particular on the booming decentralized finance (DeFi) applications.
- > Usual teaching obligations apply.

Seize the opportunity and join us in shaping the future of the University!

Ulm University with its more than 10,000 students offers varied professional tasks in a highly innovative research, teaching and work environment, at the same time facilitating the reconciliation of work and family in many ways.

We seek to increase the proportion of women in research and teaching and particularly encourages qualified female scientists to apply for this position.

Severely disabled applicants with equal aptitude will be given preferential consideration.

- > **Reference no.:** 21113
- > **Application deadline:** 31.10.2021

Hiring is done by the Central University Administration.
