sucht zeitnah einen Analysten für die Themen Datenanalyse und Rückversicherung.

The Data / Reinsurance Analyst is responsible for supporting the data and reinsurance functions within the insurance company. This includes data management, data analysis, and providing support to the data analytics. The Data / Reinsurance Analyst will work closely with other team members to ensure accurate data collection, analysis, and reporting to support the company's finance operations.

Remote and onsite working, with the opportunity to travel across Europe

Key Responsibilities:

- Data Management: Assist in the collection, organization, and validation of data related to Insurance &/ or reinsurance contracts, policies, claims, and other relevant data points. Ensure data accuracy and completeness by conducting regular data audits and implementing data quality controls.
- Data Analysis: Conduct data analysis to identify trends, patterns, and anomalies. Assist in the development of analytical models and tools to support decision-making and improve reinsurance processes. Produce reports and visualizations to communicate findings and insights to relevant stakeholders.
- Reinsurance Support: Provide administrative and analytical support to the finance team in managing reinsurance contracts and policies. Assist in the preparation of reinsurance submissions, calculations, and reports. Collaborate with internal and external stakeholders to resolve issues and ensure smooth reinsurance operations.
- Documentation and Reporting: Maintain proper documentation of data sources, data transformations, and data analysis methodologies. Prepare regular reports and presentations on reinsurance performance, trends, and other relevant metrics for management and regulatory purposes.
- Process Improvement: Continuously identify opportunities for process improvement and contribute to the implementation of enhancements to streamline data and reinsurance operations. Stay up-to-date with industry trends and best practices related to data management and reinsurance.

- Bachelor's degree in business, mathematics, statistics, or related field.
- 1-2 years of experience in data analysis or reinsurance operations preferred, but not required.
- Strong analytical skills with proficiency in data manipulation and analysis using tools such as Excel, SQL, and/or other data analysis software.
- Knowledge of insurance and reinsurance concepts, policies, and procedures.
- Excellent attention to detail and accuracy in data management and analysis.
- Ability to work independently and collaboratively in a team-oriented environment.
- Strong communication skills, both written and verbal.
- Ability to adapt to changing priorities and work in a fast-paced environment.
- Professionalism, integrity, and a commitment to maintaining confidentiality of sensitive information.
