Germany’s best young university*

4 Faculties: Medicine, Natural Sciences, Mathematics and Economics, Engineering, Computer Sciences and Psychology

more than 50 courses, more than 90 institutes

more than 2000 academic staff

Approx. 10,000 students

Door to door with businesses and industry

Time-tested concomitant support programmes

Ulm – a dynamic city in Germany’s South offering excellent quality of life

„An investment in knowledge pays the best interest.“

Benjamin Franklin
Our international finance program…

… is quantitative and practical

… teaches state-of-the-art techniques demanded on the job market and in academia

… offers a flexible curriculum according to your own goals

… allows you to network and connect with students from all over the world

Why Finance in Ulm

“The MSc Finance programme in Ulm has the capacity to equip students with the knowledge and skills necessary for a successful career in the financial industry. The flexible structure and wide range of courses offer numerous directions of specialisation, and an invaluable cultural experience is obtained through studying with colleagues from across the globe.”

Christopher Davis (England), Quantitative Management Associate, Bank of America Merrill Lynch

“What I really like about the Master in Finance program is that it offers courses that cover a wide range of areas in finance and that students are completely free to choose their own study path. The experience I gained during two years I spent in Ulm prepared me in the best possible way for my future career and enabled me to enter a leading-edge company in the area of investment and risk.”

Jovana Zavisin (Serbia), Analyst, risklab GmbH, The Investment and Risk Advisory Experts of AllianzGI Global Solutions

“MSc Finance at Uni Ulm provides students with a lot of flexibility in designing their own bespoke program in finance. Also, it is a very good opportunity to get to know Germany and German culture and meet people from around the world.”

Natalia Kalashnikova (Russia), ABS Strat, Goldman Sachs

“The Master of Finance program offers classes that are well suited to prepare students for a career in the financial sector, as well as classes that are more research oriented. Due to the various seminars I took during my studies, several group projects and the master’s thesis, I was well prepared for my Ph.D., which I am currently doing at Ulm University as well.”

Mazen Ali (Yemen), PhD student in numerical finance, Ulm University

Advantages for you

■ According to Times Higher Education, Ulm University is ranked 16th worldwide among universities under 50 years old. This is the top rank among young German universities.

■ According to German Economic Review, Ulm is ranked top 2 among German universities in finance research.

■ Our program is very quantitative and practical – it makes you stand out from the crowd.

■ The curriculum allows you to customize your studies according to your own interests and goals.

■ Ulm University offers a unique study environment. You will have many opportunities to network with other students – from both Germany and from many other countries.

■ Beautiful city, lively but safe, top rank in terms of personal well-being. Close to Europe’s financial centers and easily reachable by public transportation.

■ No tuition fees thanks to government support. Has changed for non-EU students as described on our web page.

■ Yearly job fair and contacts to industry partners via our alumni association.
Through the program, students will gain a sound understanding of cutting-edge techniques used by financial institutions, consultants, regulators and many others. Topics of the program include valuation and hedging of derivatives, portfolio and risk management, regulatory aspects, and insurance. Graduates with a sound training in these areas are sought after on the job market. The program is also an excellent preparation for doctoral studies leading to a PhD.

Core courses of the first term are Financial Mathematics and Asset Pricing. Other core courses include Practical Financial Engineering, which is designed to practice the implementation of modern financial techniques, and seminars, in which you will write and present papers and thereby prepare for the master’s thesis.

After the first term, students can decide whether to specialize in Financial Mathematics, Financial Economics or Actuarial Science. Depending on the chosen specialization, the focus of the optional courses to be taken in the second and third term will be on mathematical finance, finance or actuarial science, respectively.

What you can expect

The program is spread over four semesters (two years), with three semesters of course work and one semester to write the master’s thesis. Besides the courses from Financial Mathematics, Financial Economics and Actuarial Science, students are also requested to attend language or cultural courses. Through the program, you are also trained for GARP’s Financial Risk Manager or the professional examination of the German Actuarial Society (DAV).

Below we list a selection of optional courses that are on offer. You can find a complete list on our webpage.

Financial Mathematics
Interest Rate Models, Lévy Processes, Numerical Finance

Financial Economics and Actuarial Science

Mathematics and Statistics
Introduction to Measure-Theoretic Probability, Markov Chains and Monte Carlo Simulation, Risk Theory, Time Series Analysis

You are also requested to attend language or cultural courses.

Professional perspectives

Through the program, students will gain a sound understanding of cutting-edge techniques used by financial institutions, consultants, regulators and many others. Topics of the program include valuation and hedging of derivatives, portfolio and risk management, regulatory aspects, and insurance. Graduates with a sound training in these areas are sought after on the job market. The program is also an excellent preparation for doctoral studies leading to a PhD.

Among employers, Ulm University has an excellent reputation for well-trained finance students. Most of our graduates work for global players (e.g. Bank of America or Allianz).
