Guidelines Project Plan IGradU

Your Project plan may include:

- **Title of the project**
- **Your affiliation** (name, institute, university)
- **Introduction**
    - o Short literature review focusing on your specific topic
    - o Identification of key publications/ideas etc. relevant to your PhD topic
- **Aim** of your project
- Outline the **methodologies** that you will use
- Design of **experimental Setup**. Importantly, this will be the timeline you refer to in your following progress reports, showing how much the project progressed

    This may include… in the chronological order

    - o injection / treatment / surgical schedule
    - o Behavior experiment schedules

Guidelines Progress Report IGradU

Your Progress report may include:

- **Title of the project**
- **Your affiliation** (name, institute, university)
- **Introduction**
    - o Short literature review focusing on your specific topic
    - o Identification of key publications/ideas etc. relevant to your PhD topic
- **Aim** of your project generally and what was planned for the span of time e.g. during the first or during the second year
- **Results:** You may want to orientate on your project plan.
    - o This section can include figures, tables,… but should be a written paragraph
    - o Results can be subdivided into different sections with separate titles
- **Conclusion**: Sum up your progress in 2-4 sentences
- **Outlook**: In some sentences show what experiments are planned for the following year
    - o You can comment if you run into obstacles, how to circumvent these
