

IYTK WINTER TERM 2023/24

On Wednesday at 5 pm

#	Date	Speaker	Title	Room	Chair
1	25.10.2023	Medhanie Mulaw	Applications of AI in single-cell genomics	Internal Medicine	Sara Francesca Greco
2	15.11.2023	Marcin Lyszkiewicz	tba	Surgery	Nourice Jaber
3	22.11.2023	Gilbert Weidinger	Current concepts in regenerative biology	Internal Medicine	Anja Werberger
4	29.11.2023	Federica Diofano	Bridging Bedside to Bench in Cardiovascular Disease: Insights from Zebrafish and iPSC-Derived Cardiomyocytes Models	Internal Medicine	Badrieh Fazeli
5	06.12.2023	Tamara Phan	Current status upon polysorbate degradation in biologicals	Internal Medicine	Sandra Dietrich
6	13.12.2023	Melanie Haffner-Luntzer	Fracture healing research - from mice to humans	O27-2203	Ann-Kathrin Eiers
7	10.01.2024	Felix Weidner	Boolean network modelling and its applications in systems biology	Internal Medicine	Alicia Goreth
8	17.01.2024	Tamas Röszer	The role of RNA immunity in early adipocyte development	Zoom	Tugba Demir
9	24.01.2024	Jessica Lindenmayer	Tumor organoids and their potential for personalized medicine	Internal Medicine	Sarah Wirth
10	31.01.2024	Benjamin Mayer	Planning and analyzing research projects in the light of small sample sizes	Internal Medicine	Chenge Xin
11	07.02.2024	Jens von Einem	Getting the viral envelope - the intriguing interplay between cellular pathways and viral proteins in the secondary envelopment of herpesviruses	Internal Medicine	Jona Röscheise
