including all materials.

3RD MEETING OF THE GERMAN VASCULAR ANOMALY CENTERS
Freiburg, November 8 – 9, 2013 // Konzerthaus

www.network-vascular-centers.org
It is my pleasure to announce the

**3RD MEETING OF THE GERMAN NETWORK OF VASCULAR ANOMALIES ON 8./9. NOVEMBER 2013 IN FREIBURG**

After the 1st Meeting in October 2011 at the St. Josef-Krankenhaus in Berlin and the 2nd Meeting at the University Hospital Regensburg in March 2013, we will have another opportunity to exchange our experience in interdisciplinary treatment concepts of hemangioma, lymphangioma and arterio(-venous) malformations. During the conference we will strictly follow the classification of the I.S.S.V.A. (International Society on the Studies of Vascular Anomalies). The conference will be held again in English in order to allow participation of colleagues from all over Europe.

Our Vascular Anomalies Center at the University Medical Center of Freiburg “www.hämangiomrunde.de” is active since 1997. We are very happy to welcome all Centers already known to the Network and especially newcomers. On Friday, 8. November 2013 in the morning (10:00 – 12:30) the team members from Freiburg will give a workshop serving as introduction to the field and giving an overview of the current state-of-the-art diagnostics and therapies for vascular anomalies.

It would be great if you could bring along all your interdisciplinary members of your Vascular Anomalies Center. I hope that the program we have put together will give us a very interesting meeting with up to date science.

Looking forward welcoming you here in Freiburg

Kind Regards,

Prof. Dr. Jochen Rößler
