

PUBLICATIONS (1991-2014)

- [1] Nonperturbative many-body techniques applied to the Yang-Mills Hamiltonian in the Schwinger gauge,
J. Ankerhold and D. Schütte, *Phys. Rev. D* 43, 1991–1998 (1991).
- [2] The density matrix near the top of a potential barrier: a problem of caustics in path integration,
J. Ankerhold and H. Grabert, *Physica A* 188, 568–596 (1992).
- [3] Semiclassical density matrix for the Eckart barrier including the region near the caustic,
J. Ankerhold, F. J. Weiper, and H. Grabert, in: H. Grabert et al. (eds.), *Path Integrals from meV to MeV* (World Scientific, Singapore 1993).
- [4] Semiclassical Methods for Dissipative Systems with Potential Barriers,
J. Ankerhold, (Thesis, University of Essen, 1994)
- [5] Dissipative quantum systems with a potential barrier: General theory and the parabolic barrier,
J. Ankerhold, H. Grabert, and G.-L. Ingold, *Phys. Rev. E* 51, 4267–4281 (1995).
- [6] Dissipative quantum systems with a potential barrier. II. Dynamics near the barrier top,
J. Ankerhold and H. Grabert, *Phys. Rev. E* 52, 4704–4723 (1995).
- [7] Semiclassical density matrix near the top of a potential barrier,
F. J. Weiper, J. Ankerhold, and H. Grabert, *Physica A* 223, 193–213 (1996).
- [8] Quantum effects in barrier dynamics,
J. Ankerhold and H. Grabert, *Chem. Phys.* 204, 27–40 (1996).
- [9] Exact and Semiclassical Density Matrix of a Particle Moving in Barrier Potential with Bound States,
F. J. Weiper, J. Ankerhold, and H. Grabert, *J. Chem. Phys.* 104, 7526–7538 (1996).
- [10] Semiclassical Quantization of Nonseparable Systems without Periodic Orbits,
F. J. Weiper, J. Ankerhold, H. Grabert, E. Pollak, *Phys. Rev. Lett.* 77, 2662–2665 (1996).
- [11] Dissipative quantum systems with a potential barrier. III. Steady state nonequilibrium flux across the barrier,
J. Ankerhold and H. Grabert, *Phys. Rev. E* 55, 1355–1374 (1997).
- [12] Agmon–Hopfield kinetics in the slow diffusion regime,
P. Pechukas and J. Ankerhold, *J. Chem. Phys.* 107, 2444–2450 (1997).
- [13] Is the direct observation of electronic coherence in electron transfer reactions possible?,

A. Lucke, C.H. Mak, R. Egger, J. Ankerhold, J. Stockburger, H. Grabert, *J. Chem. Phys.* 107, 8397–8408 (1997).

[14] Orientational quantum melting and reentrance of linear rotors pinned onto surfaces,
M.H. Müser and J. Ankerhold, *Europhys. Lett.* 44, 216–221 (1998).

[15] Mathematical aspects of the fluctuating barrier problem. Existence of equilibrium and relaxation solutions,
P. Pechukas and J. Ankerhold, *Chem. Phys.* 235, 5–10 (1998).

[16] Mathematical aspects of the fluctuating barrier problem. Explicit equilibrium and relaxation solutions,
J. Ankerhold and P. Pechukas, *Physica A* 261, 458–470 (1998).

[17] Eigenvector-eigenvalue rate calculations for the fluctuating barrier problem: Two examples,
J. Ankerhold and P. Pechukas, *Phys. Rev. E* 58, 6968–6974 (1998).

[18] Partitioning dynamic and thermal factors in quantum rate calculations: a coherent state approach ,
J. Ankerhold, F. Grossmann, and D. Tannor, *PCCP* 1, 1333–1342 (1999).

[19] Quantum tunneling and the semiclassical real time evolution of the density matrix,
J. Ankerhold and H. Grabert, *Europhys. Lett.* 47, 285–291 (1999).

[20] Semiclassical real-time theory of quantum tunneling,
J. Ankerhold and H. Grabert in: *Path Integrals from peV to TeV* R. Casalbuoni et al. (eds.) (World Scientific, Singapore, 1999).

[21] Reaction rates for fluctuating barriers with asymmetric noise,
J. Ankerhold and P. Pechukas, *J. Chem. Phys.* 111, 4886–4892 (1999).

[22] Semiclassical time evolution of the density matrix and tunneling,
J. Ankerhold and H. Grabert, *Phys. Rev. E* 61, 3450–3465 (2000).

[23] Quantum fluctuating barriers,
J. Ankerhold and P. Pechukas, *Europhys. Lett.* 52, 264–270 (2000).

[24] Quantum Smoluchowski equation,
P. Pechukas, J. Ankerhold, and H. Grabert, *Ann. Phys. (Leipzig)* 9, 794–803 (2000).

[25] Quantum Smoluchowski equation II: The overdamped harmonic oscillator,
P. Pechukas, J. Ankerhold, and H. Grabert, *Phys. Chem. B* 105, 6638–6641 (2001).

[26] Tunneling in Complex Systems and Periodic Orbits,
J. Ankerhold, *Adv. Solid State Phys.* 41, 433–445 (2001).

[27] Dissipative wave–packet dynamics and electron transfer,
A. Lucke and J. Ankerhold, *J. Chem. Phys.* 115, 4696–4707 (2001).

- [28] Strong friction limit in quantum mechanics: the quantum Smoluchowski equation,
J. Ankerhold, P. Pechukas, and H. Grabert, *Phys. Rev. Lett.* 87, 086802 (2001); *ibid* 101, 119903 (2008) (Erratum).
- [29] Extensions of the perturbed SPA: Decay rates of damped systems and improvement for small temperatures,
C. Rummel, H. Hofmann, and J. Ankerhold, in *The Nuclear Many-Body Problem 2001* W. Nazarewicz and D. Vretenar (eds.), (Kluwer, 2002).
- [30] Quantum decay rates for driven barrier potentials in the strong friction limit,
J. Ankerhold, *Phys. Rev. E* 64, 060102 (Rapid Comm.) (2001).
- [31] A study of the semiclassical initial value representation at short times
J. Ankerhold, M. Saltzer, and E. Pollak, *J. Chem. Phys.* 116, 5925–5932 (2002).
- [32] Partition function for an interacting many body system: beyond the perturbed static path approximation,
C. Rummel and J. Ankerhold, *EPJ B* 29, 105 (2002).
- [33] Semiclassical wave-packet tunneling in real-time,
J. Ankerhold and M. Saltzer, *Phys. Lett. A* 305, 251 (2002).
- [34] Phase space dynamics of overdamped quantum systems,
J. Ankerhold, *Europhys. Lett.* 61, 301 (2003).
- [35] Quantum dynamics with strong friction: The quantum Smoluchowski equation and beyond,
J. Ankerhold, invited contribution to *Physica Acta Polonica B* 34, 3569 (2003).
- [36] Dynamics of quantum dissipative systems—from path integrals to Master equations,
J. Ankerhold, invited contribution to *Irreversible Quantum Dynamics*, Lecture Notes in Physics 622, F. Benatti, R. Floreani (eds.), (Springer, Heidelberg, 2003).
- [37] Wave packet dynamics and tunneling in external time dependent fields: A semiclassical approach,
M. Saltzer and J. Ankerhold, invited contribution to “Recent Research in Quantum Theory” (Nova Publishers, New York, 2004).
- [38] Semiclassical tunneling in real-time: Wave packet dynamics in static and driven barrier potentials,
M. Saltzer and J. Ankerhold, *Phys. Rev. A* 68, 042108 (2003).
- [39] Enhancement of Macroscopic Quantum Tunneling by Landau Zener Transitions,
J. Ankerhold and H. Grabert, *Phys. Rev. Lett.* 91, 016803 (2003).

- [40] Low temperature electron transfer in strongly condensed phase, H. Lehle and J. Ankerhold, *J. Chem. Phys.* 120, 1436 (2004).
- [41] Macroscopic Quantum Tunneling of Quantum Bits, J. Ankerhold and H. Grabert, in: *Proceedings of the 39th Rencontres de Moriond*, D.C. Glattli, M. Sanquer, J.T.T. Van (eds.), "Quantum Information and Decoherence in Nanosystems", 137 (2005).
- [42] Path-integral Monte Carlo simulations for electronic dynamics on molecular chains: I. Sequential hopping and superexchange
M. Mühlbacher, J. Ankerhold, and C. Escher, *J. Chem. Phys.* 121, 12696 (2004).
- [43] Quantum Brownian Motion at Large Friction
J. Ankerhold, H. Grabert, and P. Pechukas, invited contribution to a focus issue in *CHAOS: 100 years of Brownian motion*, *Chaos* 15, 026106 (2005).
- [44] Quantum phase diffusion and charging effects in overdamped Josephson junctions,
J. Ankerhold, *Europhys. Lett.* 67, 280 (2004).
- [45] Zener Enhancement of Quantum Tunneling in a Two Level Superconducting Circuit
G. Ithier, E. Collin, P. Jouyez, D. Vion, D. Esteve, and J. Ankerhold and H. Grabert, *Phys. Rev. Lett.* 94, 057004 (2005); *ibid* 96, 029901 (2006)(Erratum).
- [46] Path-integral Monte Carlo simulations for electronic dynamics on molecular chains: II. Transport across impurities
L. Mühlbacher, J. Ankerhold, *J. Chem. Phys.* 122, 184715 (2005).
- [47] Influence of low frequency noise on macroscopic quantum tunneling in superconducting circuits,
M. Duckheim and J. Ankerhold, *Phys. Rev. B* 71, 134501 (2005).
- [48] Comment on "Quantum Tunneling at Zero Temperature in the Strong Friction Limit",
J. Ankerhold, H. Grabert, and P. Pechukas, *Phys. Rev. Lett.* 95, 079801 (2005).
- [49] Real-time Monte-Carlo Simulations for tight-binding systems and time-local master equations,
L. Mühlbacher, C. Escher, and J. Ankerhold, special issue in *Chem. Phys.* 322, 200 (2006).
- [50] How to detect the fourth order cumulant of electrical noise,
J. Ankerhold and H. Grabert, *Phys. Rev. Lett.* 95, 186601 (2005).
- [51] Non-equilibrium Dynamics of Correlated Electron Transfer in Molecular Chains
L. Mühlbacher, J. Ankerhold, and A. Komnik, *Phys. Rev. Lett.* 95, 220404 (2005).

- [52] Nonequilibrium many-body dynamics along a dissipative Hubbard chain: Symmetries and Quantum Monte Carlo simulations
L. Mühlbacher and J. Ankerhold, Phys. Rev. B 74, 165105 (2006).
- [53] Single and correlated charge transport across molecular wires
L. Mühlbacher and J. Ankerhold, in: Dynamics of Open Quantum Systems, K.H. Hughes (ed.), (CCP6, Daresbury, 2006), 30.
- [54] Detecting electrical noise with a Josephson junction: A problem of thermal escape in presence of non-Gaussian fluctuations
J. Ankerhold, Phys. Rev. Lett. 98, 036601 (2007); *ibid* 99, 139901 (2007) (Erratum).
- [55] Dissipation can enhance quantum effects
J. Ankerhold and E. Pollak, Phys. Rev. E 75, 041103 (2007).
- [56] Effects of interactions and noise of Bose-Einstein condensates through a potential barrier
J. Huhtamäki, M. Möttönen, J. Ankerhold, and S.M.M. Virtanen, Phys. Rev. A 76, 033605 (2007).
- [57] Josephson junctions as detectors for non-Gaussian noise
B. Huard, H.Pothier, N.O. Birge, D. Esteve, X. Waintal, and J. Ankerhold, Ann. Phys. 16, 736 (2007).
- [58] Correlated transport of fermions and bosons along molecular chains
L. Mühlbacher and J. Ankerhold, New J. Phys. 10, 065023 (2008).
- [59] Charge transfer dynamics in driven molecular ratchets: Quantum Monte Carlo results and rate models
L. Mühlbacher and J. Ankerhold, J., New J.Phys. 10, 065023 (2008)
- [60] Non-Markovian semiclassical dissipative dynamics,
J. Koch, F. Grossmann, J.T. Stockburger, and J. Ankerhold, Phys. Rev. Lett. 100, 230402 (2008).
- [61] Counting electrical charges: a problem of thermal escape and quantum tunneling in presence of non-Gaussian noise,
J. Ankerhold, in: Proceedings Path Integrals—new trends and perspectives, W. Jahnke and A. Pelster (eds.), World Scientific, 453 (2009).
- [62] Semiclassical theory of energy diffusive escape
A. Verso and J. Ankerhold, Phys. Rev. A. 79, 022115 (2009).
- [63] Nonadiabatic effects in the quantum phase diffusion in superconducting atomic point contacts
H. Fritz and J. Ankerhold, Phys. Rev. B 80, 064502 (2009).
- [64] Semiclassical formulation of non-Markovian quantum Brownian motion,
J. Koch, F. Grossmann, J. Ankerhold, J.T. Stockburger, Physica E 42, 388 (2010).

- [65] Quantum Smoluchowski equation—a systematic study,
S. Maier and J. Ankerhold, Phys. Rev. E 81, 021107 (2010).
- [66] Low temperature quantum fluctuation in overdamped ratchets,
S. Maier and J. Ankerhold, Phys. Rev. E 82, 021104 (2010).
- [67] Semiclassical non-Markovian Brownian motion in anharmonic potentials,
J. Koch, F. Grossmann, J.T. Stockburger, and J. Ankerhold, Chem. Phys.
370, 34 (2010).
- [68] Dissipation in a rotating frame: master equation, effective temperature,
and Lamb-shift,
A. Verso and J. Ankerhold, Phys. Rev. A 81, 022110 (2010).
- [69] Semiclassical theory of energy diffusive escape in a Duffing oscillator,
A. Verso and J. Ankerhold, Phys. Rev. E 82, 051116 (2010).
- [70] Adiabatically steered open quantum systems: Master equation and optimal
phase,
J. Salmilehto, P. Solinas, J. Ankerhold, and M. Möttönen, Phys. Rev. A
82, 062112 (2010).
- [71] Tunneling in open systems,
A. Verso and J. Ankerhold, in: Dynamical Tunneling, S. Keshvamarthy
and P. Schlagheck (eds.), (Taylor and Francis, 2011), 401.
- [72] Quantum dynamics of a two-level system in a structured environment:
Numerical study beyond perturbation theory,
J. C. Escher and J. Ankerhold, Phys. Rev. A 83, 032112 (2011).
- [73] Charge transfer through single molecular contacts: How reliable are rate
descriptions?,
D. Kast, L. Kecke and J. Ankerhold, Beilstein J. Nanotechnol. 2, 416
(2011).
- [74] Optimal control of open quantum systems: cooperative effects of driving
and dissipation,
R. Schmidt, A. Negretti, J. Ankerhold, T. Calarco and J.T. Stockburger,
Phys. Rev. Lett. 107, 13040 (2011).
- [75] Measurement scheme for the Lamb shift in a superconducting circuit with
broadband environment,
V. Gramich, P. Solinas, M. Möttönen, J. P. Pekola, J. Ankerhold, Phys.
Rev. A 84, 052103 (2011).
