

Friday 11.11.2016			
09:00 – 09:10	Z01	Gebhard	Welcome News
09:10 – 09:30	A01	Chakraborty	Barrier dysfunction after polytrauma
09:30 – 09:50	A02	Grabrucker Cursano	Update A02
09:50 – 10:10	A03	Reichel Tepper	Functional analysis of IKK/ K ϵ - κ B signaling in TBI
10:10 – 10:30	A04	Martin Fischer	Novel tools for targeted pharmacological modulation of monocytes and dendritic cells
10:30 – 11:00	Coffee break		
11:00 – 11:20	A05	Winkelmann	Update A05
11:20 – 11:40	A06	Eiseler	Role of protein kinase D in trauma-induced neutrophil chemotaxis
11:40 – 12:00	A07	Hüsecken	Blunt chest trauma induces the induction of T cell suppressive MDSCs
12:00 – 12:20	B02	Merz	Impact of glucose metabolism on the H ₂ S-system during circulatory shock
12:20 – 12:40	B03	McCook	Interaction of circulatory shock and atherosclerosis on the H ₂ S-producing enzymes in the coronary vasculature
12:15 – 13:30	Lunch Restaurant		
13:30 – 14:00	Guided Tour Abbey Church		

14:00 – 14:20	B04	Knippschild Werner	Influence of obesity on muscle regeneration: Expression profiling data
14:20 – 14:40	B05	olde Heuvel Chandrasekar	Updates on innovative neuroprotection in TBI
14:40 – 15:00	C01	Kaiser Prystaz	IL-6 signaling in inflammation and repair after bone fracture
15:00 – 15:20	C02	Rapp Hachemi	Molecular mechanisms of glucocorticoid action during fracture healing after severe trauma
15:20 – 15:40	C03	Weidinger	Screening for regulators of regeneration
15:40 – 16:00	C04	Geiger Vogel Sacma	Stem cell mobilization in trauma
16:00 – 16:30	Coffee break		
16:30 – 16:50	C05	Munir Jiang	Adaptive response of MSC in inflammation after tissue trauma
16:50 – 17:10	C06	Wanner Förstner	Functions of neuronal transcription factors in brain trauma models
17:10 – 17:30	Psych-Phys Interaction	Reber	Inflammatory reaction after psychosocial stress
17:30 – 17:50	Psych-Phys Interaction	Plener	The impact of childhood adversities on adult health
17:50 – 18:10	Psych-Phys Interaction	Waller	Psychosocial stress during childhood-induced disturbance of oxytocin-related adult cardio-vascular homoeostasis
18:10		Gebhard	Disclosure
