

Weekly Course Plan (from 2020/10/23)

MSc Cognitive Systems

Winter term 2020

Time	Monday	Tuesday	Wednesday	Thursday	Friday
08 - 09					Preproc. and Analysis
09 - 10					
10 - 11	Driver-Vehicle Interaction	Introduction to AI Deep Learn. Graphics ProfMeeting Psychology		Topics in Cognitive Psychology	Foundations and Concepts of CogSys Modeling Preproc. and Analysis Research Colloq: Recent Developments in Cogn. Neuroscience (11-13)
11 - 12					
12 - 13	Cognitive Systems I Learning Robots	ProfMeeting Computer Science	Can you hear it?	Intro. to Psy. Methods + Statistics	Neurotechnology: Brain-Machine-Interfacing
13 - 14					
14 - 15	Psy. of Automation Adv. Methods in Data Mining Introduction to AI	Introduction to Psy. Methods + Statistics	Committees	Cognitive Systems I Adv. Methods in Data Mining Deep Learn. Graphics	Seminar Trends in Applied AI Neurotechnology: Brain-Machine-Interfacing
15 - 16					
16 - 17	Psy. of Automation Self Regulation	Intr. to Computer Science	Committees		
17 - 18					

Red = Uni Ost, Blue = Uni West, Green = Klinik für Psychiatrie III, Black = online, no room

Block courses: Theories and Application of Navigation in Men and Machine; DeepVision - Deep Learning and Convolutional Neural Networks in Computational Vision

By arrangement:

Advanced Semantic Web; Advanced Automated Reasoning; Automated Reasoning; Brain-Machine-Interfacing; Concepts of Intelligence; Deep Learning Architectures; Deep Learning for Autonomous Cars; Dialogue Systems for Cognitive Systems; Explainable Artificial Intelligence; Investigating Functions in Perception, Cognition and Motor Behavior; Investigations in Cognitive Ergonomics – Basics & Research Trends; Multisensory Perception for Action 1 & 2; Semantic Web; Thinking about Science
