We are happy to have you as students here at Ulm University. Your choice of Ulm University as your place of study reconfirms our efforts to offer young people an attractive and future-oriented education.

The University was founded in 1967 as a university for medicine and natural sciences and has since become an internationally recognised and renowned research university with more than 30,000 students. Teaching and research are geared to contribute to the solution of concrete societal challenges in the areas energy, mobility, health and new technologies. They benefit from an almost unique range of subjects strategically focussing around the WINT area, i.e., mathematics, computer science, natural sciences and technology, as well as medicine. Teaching at Ulm University is research- and application-oriented and close contact between teachers and students makes for attractive study conditions. The University has excellent international contacts and offers interesting opportunities for studying abroad.

Its prospering and application-oriented environment greatly benefits all students contributing to the hands-on approach of education at Ulm University. Ulm University plays a pivotal role at the centre of the Science City of Ulm, a successful network of science, business and medical care.

Ulm University is an integral part of the city of Ulm and is deeply rooted in the city and the region. Ulm and its surroundings afford an attractive and liveable environment with a wide range of recreational activities and cultural offers. Take advantage of these opportunities and make yourself at home in Ulm!

On your first day, everything is new and you may find it difficult to grasp the organisation and scope of opportunities offered by Ulm University. It also marks the beginning of a new phase in your life in new and unfamiliar surroundings. Take your time to get to know the University well and learn all you need. Our aim is to provide you with an environment in which you can successfully pursue your degree opening up excellent professional perspectives.

Central and subject-specific student advisory services are happy to assist you with any queries. Don’t hesitate to address your lecturers with any doubt you may have.

I wish you a great start and all the best for your studies!

Cordially yours,
Prof. Dr.-Ing. Michael Weber
President
